

MUSEUM MYSTERY! Pt. II

Now imagine a day in the life of this animal. Use all the clues you discovered to create your own story with words or pictures below!

Background Info

- Species Name: Sperm Whale
- Habitat: Deep oceans globally
- Diet: Squid, fish, sharks
- Fun Fact: One of the deepest diving mammals (up to 7,380 ft)

.....

Once upon a time, there was a sperm whale named Gary who roamed the oceans of the world. Gary loved making new friends and said hello to every animal he saw. Sadly, many of the animals he encountered would quickly swim away from him because he was so huge and scary looking!

On a particularly hot day Gary decided to take a deep dive to the bottom of the ocean. There he saw a shiny gold treasure box in the sand. When he reached out to grab it a large red tentacle wrapped around it! A giant squid emerged from behind the treasure box and said, "This is my treasure!" Gary apologized and started to leave but realized the giant squid wasn't afraid of him like everyone else. He swiftly swam back to the squid and asked, "What is your name?" The squid looked confused for a moment but replied "Edna."

Gary smiled and continued to ask Edna questions for hours. They are now best friends and Gary dives down to see Edna once a day.

The End!
